

Better preparation. More informed Board review.

Bring agendas, staff submissions, supporting evidence and meeting records into one connected workflow.

Scattered files. Repeated follow-up. Hard-to-trace changes.
AboveBoard connects the work around the agenda so staff and members can focus on the meeting.

PREPARE THE AGENDA

REVIEW ITEM BY ITEM

Actual TEST views • Synthetic data • September 29, 2026 • Civic Desk palette

01 Prepare with less re-entry

Agenda tools: reuse a prior agenda, start from an outline or import a PDF; edit and reorder items.
Document Inbox: organize incoming files and associate supporting material with agenda items.
Staff submissions: use structured forms, review responses and request corrections before inclusion.

02 Give members useful context

Agenda-first review: keep the selected item beside the meeting outline.
Evidence-linked briefs: see decision context, source references and explicit unknowns.
Controlled releases: prepare drafts, preview audiences and preserve versioned Board and Public packets separately.

03 Keep governance work visible

Meeting records: record attendance, motions and individual votes; return to retained meeting history.
Governance tools: track checklist evidence, people and service periods, and calendar planning.
District forms: start with templates for nursing, attendance, CTE, field trips and travel.

Built around the way your district works. See how AboveBoard supports agenda preparation and Board review in a demonstration tailored to your district.

Product validation is ongoing. Specialist reporting and provider connections require district configuration, suitable inputs and authorization. Screenshots show selected workflows, not every capability.
